Summary

B.Tech Computer Science student with hands on experience building AI and web development projects, including an AI Resume Analyzer and an Expense Tracker. Skilled in Python, Java, and C, with a strong foundation in Git/GitHub workflows. Actively participated in hackathons and project exhibitions, seeking a Software Engineering internship/role to apply and grow technical, analytical, and problem solving skills.

Technical Skills

Languages: Python, Java, C, JavaScript, TypeScript

Web Technologies: HTML, CSS, React.js

Backend & Database: MySQL, SQLite, Firebase, Firestore, Cloudflare Workers, REST API

Tools & Platforms: Git, GitHub, VS Code, Vercel, Cloudinary

Core Concepts: Data Structures, OOP, DBMS

Areas of Interest: Artificial Intelligence, Web Development

Experience

GeeksforGeeks

Remote

Campus Mantri

Jun 2026 – Present

- Selected as Campus Mantri 2026, representing GeeksforGeeks on campus to promote learning opportunities and drive student engagement.
- Organized outreach activities, coding contests, and technical workshops to boost participation and awareness among peer communities.

Codtech IT Solutions Private Limited

Remote

Python Programming Intern

Jun 2026 – Jul 2026

- Completed a 6 week Python Programming internship, successfully delivering assigned tasks while demonstrating strong technical skills and dedication.

Projects

Smart Hostel Management System | *JavaScript, Firebase, Cloudflare Workers, Cloudinary*

GitHub

- Built a full stack, multi hostel management platform with OTP verified registration, separate Student/Admin dashboards, and Firestore security rules enforcing per user data access and role based Admin control.
- Engineered a serverless email OTP pipeline with Cloudflare Workers and the Brevo API to keep API secrets off the client, and implemented QR based digital ID card verification with Cloudinary hosted media.

AI Resume Analyzer | *React, TypeScript, Flask, Python, SQLite*

GitHub

- Built a full stack ATS style resume analyzer with keyword matching and skill gap analysis to help candidates improve job application relevance.
- Integrated a React frontend with a Flask backend and implemented AI based feedback generation for resume improvement suggestions.

Expense Tracker | *Python, Tkinter, CSV, JSON*

GitHub

- Built a desktop expense tracker with transaction categorization, persistent data storage, and spending trend visualization for personal finance tracking.

Education

Einstein Academy of Technology and Management (EATM), Bhubaneswar

Bhubaneswar, Odisha

Bachelor of Technology in Computer Science and Engineering

Aug 2024 – Apr 2028 (Expected)

Certifications & Achievements

- Participated in hackathons including **GIET HackFest 2.0**, **BPUT Hackathon**, and **Adastra 2025**.
- Presented projects at **INNOVISION 2026** and **BPUT Project Exhibition 2025**.
- Completed a Bootcamp on **Big Data & Data Science**, CDAC Noida.
- Completed the **TestMu AI Bootcamp** (in collaboration with GeeksforGeeks) on browser automation and AI agent infrastructure.

Activities

- Participated in hackathons and coding competitions.
- Presented projects at project exhibitions focused on open innovation.
- Active member of Bug Smashers (Coding Club), organizing and coordinating coding events and college level tech fests.
- Volunteered at ICSTSEIM-2026, an international conference on smart technologies and sustainable engineering.
